

LONG-TERM CARE FACILITY (LTCF) How to ADD and EDIT Facility CMS Certification Number (CCN) within NHSN

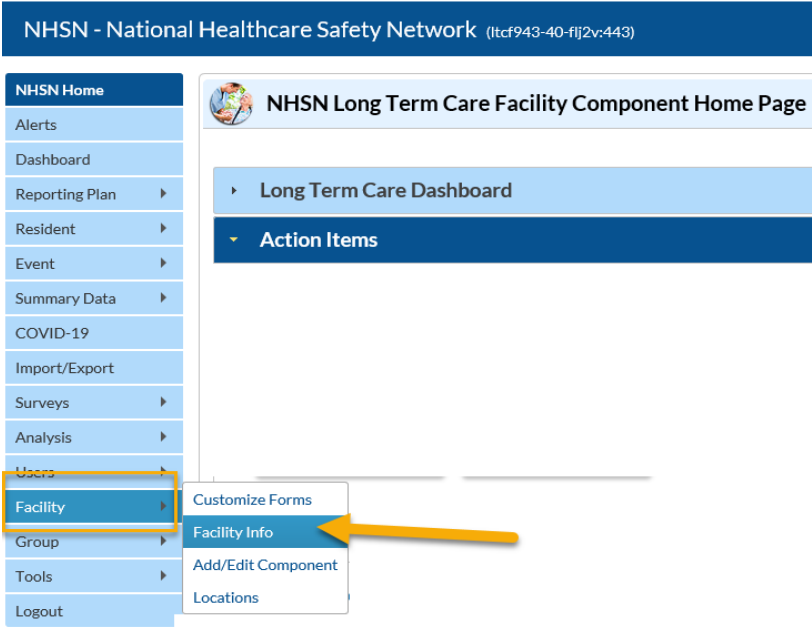

One way the CDC’s National Healthcare Safety Network (NHSN) tracks reported data from Long-Term Care Facilities (LTCFs) is through the assigned CMS Certification Number (CCN) and, thus, it is imperative to have the accurate CCN listed for the facility. CCNs may also be used as unique identifiers for the facility if the facility participates in data-reporting projects led by partners, such as CMS or the state health department. Below are instructions to add a new facility CCN and to edit an existing or incorrect CCN within the NHSN application.

- To view the instructions on **ADDING** a CCN to the facility, begin on page 1, below.
- To view instructions on **EDITING THE PRE-EXISTING** CCN, begin on [page 6](#).

I. ADD CMS Certification Number (CCN)

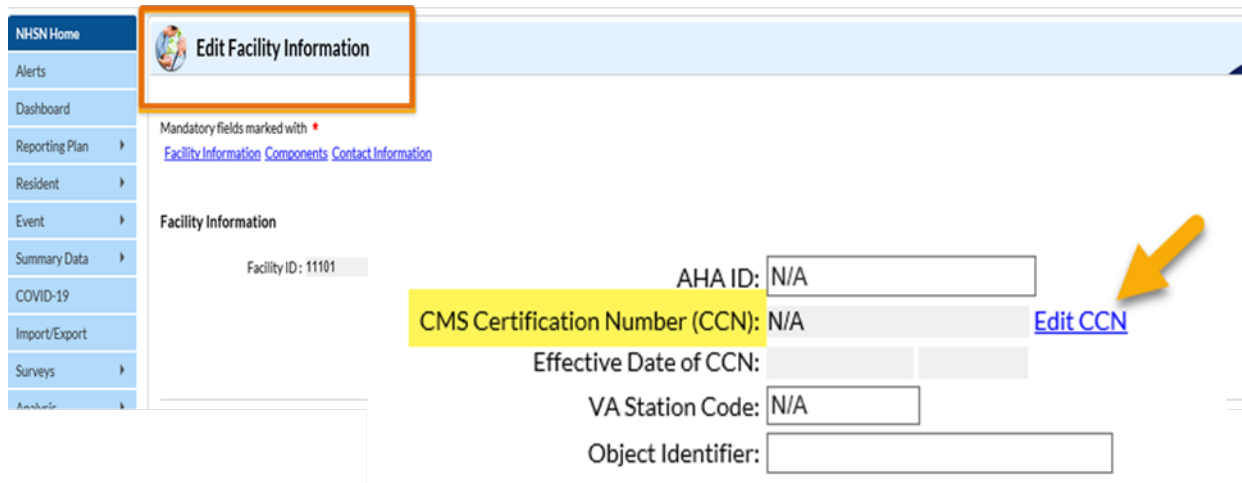

The instructions below demonstrate how to **ADD** a CCN. The **ADD CCN** function is used when the CCN was not entered during NHSN enrollment **or** if the CCN and Effective Date have changed for a facility due to a change in ownership or other reasons.

1. The NHSN facility administrator or a user with NHSN administrative rights must first navigate to the **FACILITY -> FACILITY INFO** tab on the left navigation menu.

Important Notes:

- The footnote message may not be applicable to LTCFs without CMS reporting requirements.
- Do not delete a row with an existing CCN and Effective date, unless data was entered in error. This is important since data may be associated with the pre-existing CCN. Instead, ADD a new row to enter the new CCN and the new *Effective Date*.
